

## SHOVEL SPOONS

Our Spoon Shovel blades are made from the same high-carbon steel as the rest of our shovel line. We use our own unique patterns to manufacture the Eastern and Western styles.

Western pattern (W) is designed for harder, clay-like soils.

Eastern pattern (E) is designed for lighter, sandier soils.

Both designs have a scoop shape for lifting mud, water and backfill from deep holes. The shovel straps and handle have footage markers to indicate hole depth.

### Spoons

No.	Description / Size	WT	Shipping	Handle No.
*2023	Ash 7' W	8#	UPS	1005

## TAMP BARS

Oshkosh Tool Wood-Handle Tamp Bars are offered in three weights and a variety of handle lengths. Tamp bars are used to flatten and smooth dirt, stone, asphalt and other aggregate.

Curved-Head Tamp Bars (3698) are designed and built to tamp closer to the wall of the hole or closer to the pole itself. The unique curved-head design helps to prevent "knuckle-busting" on the pole.

Steel Tamp Bars (1044) are made from 1" diameter stock with malleable iron tamping heads 4" (round) and 6" x 3-3/4" (oval shape).

### Tamp Bars

No.	Description / Size	WT	Shipping	Handle No.
1044	8' Steel	19#	UPS OS	N.A.
