

VOLTAGE DETECTORS

VOLTAGE DETECTOR - PROXIMITY/ DIRECT CONTACT (0 - 40KV)

Dual application design. Detects voltage both as a proximity or direct contact meter on overhead and underground systems.

- Five-Position selector switch controls different functions:
 - P - Indicates voltage in proximity to line
 - URD - Detects voltage on underground systems
 - OH - Detects overhead voltage 0 - 10 kV
 - X4 - Detects overhead voltage 11 - 40kV
 - T - Tests and verifies meter function
- Selector switch calibrated for height above ground to compensate for capacitive coupling effect
- Reads only contacted test point. Indicates line-to-ground values for nominal or induced voltages
- Easy to read analog scale
- Over load protected up to 66.5kV (115kV phase-to-phase)

VOLTAGE DETECTOR (0-40kV)

Multi-function design for voltage detection on overhead and underground systems with ability to read capacitive test points

- Five-position selector switch controls different functions:
 - C - Indicates voltage on capacitive test points
 - URD - Detects voltage on underground systems
 - OH - Detects overhead voltage 0 - 10kV
 - X4 - Detects overhead voltage 11 - 4kV
 - T - Tests and verifies meter function
- Selector switch calibrated for height above ground to compensate for capacitive coupling effect
- Reads only contacted test point and indicates line-to-ground values for nominal or induced voltages.
- Easy to read analog scale
- Over load protected to 66.5kV (115kV phase-to-phase)
- Completely shielded to minimize stray field interference

VOLTAGE DETECTOR (0 - 300kV)

Widest voltage range (4kV - 500kV) available in one voltage detector. Designed for use on overhead and underground systems.

- Indicates approximate nominal or induced voltage in line-to-ground values
- Easy to read analog scale
- Dual linear / logarithmic scale for better resolution on 4kV systems
- Requires no voltage scale selector switch or multipliers
- Hold and backlight functions available on VDAH300
- Totally passive meter function
- Optional adapters available for underground use up to 35kV
- Watertight construction
- See page 214 for Accessories
