Notched Blade	70803	70863	70893	70903
Notched & Blunt Point	70804	70864	70894	70904

## THE BUCKSKINNER

**7095**

A single long steady pulling stroke of the Buckskinner easily removes insulation and semi-con from all types of cable. Just peel the rest off! It's patent contoured blade and unique stripping edge safely "shaves" insulation or semi-con from a wide range of cable sizes without damaging the conductor. Call for a free on-site demonstration.

**70951**

Buckskinner Guard protects the blade from being nicked and the user from being cut. Easy slip on design.

**4051**

Buckskinner Holster offered with a single punched hole to hang on Linemans belt or with 2" slots to slide onto a leather belt.

## SCISSORS

## KNIFE POUCHES

## SAWS/BLADES

### Golden Tri-Cut™ Blades

Unique design provides three teeth-sizes on one blade. Has 32 teeth/inch up front for quick starts, 24 teeth/inch in the middle and 18 teeth/inch on the end for fast and smooth conventional cutting. Special high-speed steel teeth fused to carbon-steel give superior cutting action and long life. Blade length is 12". Fits all 12 inch blade hacksaws. Gold finish. Available in box of 100 blades or in recloseable heavy-vinyl seal-tight pouch of ten blades.

No.	Cat. No.	Teeth per Inch
100-Pack	10-Pack	
1200BI	1200BI-P	32-24-18

The 32 teeth/inch up front give fast and easy starts.

The 24 teeth/inch in the middle eases blade into the full cut.

The 18 teeth/inch on the end give more bite for heavy cutting

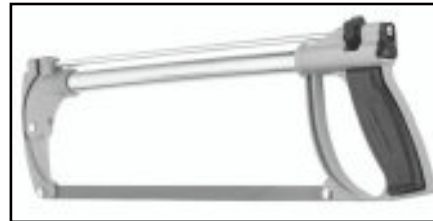

44150

#### Multi-Purpose Sharpening Steel

A knife sharpener—and a lot more. Tungsten-carbide bonded to fine, medium and rough sharpening surfaces, hardens this steel enough to dress any knife. Chisel point makes tool useful for hacking, prying, scraping, splitting, cutting sheet metal or other rough jobs that would harm a knife. Leather-sheath handle folds out of the way for use as a sharpener, provides a convenient way to hold tool when used as a chisel or other tool. Leather lanyard holds tool in sheath and secures it to belt or ring.

No.	Overall Size of Steel
44150	5" x 7/8" x 1/4"

701-AL

#### Light-Weight Hacksaw

Heavy-duty professional quality, yet light enough for overhead cutting or use from a ladder or scaffold. Strong tubular steel frame with cast-aluminum handles, comfortable molded plastic grip inserts. Pivot-action front end and large knurled thumbscrew at handle for easy blade tension adjustment. Blade cuts fully through to a flat surface. Removable retaining pins permit quick blade conversion to horizontal position for full-flush cutting. Storage chamber for extra blades. Supplied with blade.

No.	Overall Length	Blade Length
701-AL	16 1/4"	12"

700-12

#### "The Industrial" Hacksaw

Economical and exceptionally light in weight, but made to professional standards. Trim outline and compact design make it easy to use in confined spaces. Lighter weight and good balance make it less tiring for overhead work. Tubular steel frame, cast-aluminum handles with comfortable plastic grip inserts. Blade cuts fully through to a flat surface. Wing nut provides simple, direct blade tension adjustment and easy conversion to horizontal position for nearly-flush cutting. Supplied with blade.

No.	Overall Length	Blade Length
700-12	16 1/2"	12"
