Replacement gaff kits include 1 pair of gaffs, 4 stainless steel 5/32" Allen wrench screws, Allen wrench and instructions.

For pin style replaceable gaffs see page 8.

CLIMBER OPTIONS

REPLACEABLE GAFF ATTACHMENT OPTIONS

New screw type replaceable gaff.

Pin Style Replaceable Gaff: Available on all steel replaceable gaff climbers.

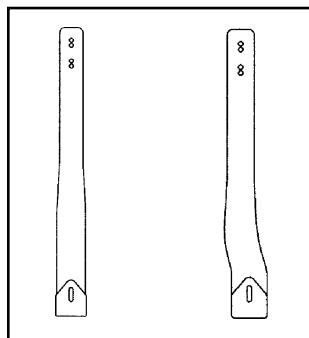

Detail of replaceable gaffs 9206, 9306

Screw Style Replaceable Gaff: Available on Titanium replaceable gaff climbers and for Steel replaceable climbers. To order a steel climber with screw style replaceable gaffs add 'SB' as a prefix to the steel climber part number.
E.g.: SB94059.

Straight Stirrup versus Offset Stirrup (Designated in 2nd digit of model number)

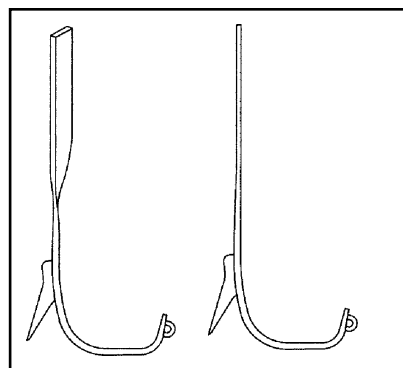

Straight

Offset

The Straight Stirrup climber style has a tendency to support the user's foot further back on the base of the arch.

The Offset Stirrup climber style places the stirrup in the center of the user's arch.

Twisted Shank versus Straight Shank

Twisted Shank

Straight Shank

The Twisted Shank is designed so the climber follows the contour of the user's calf muscle when worn in the middle of the leg or if the user has a large calf muscle. The Twisted Shank will be available on any style climber by adding the suffix 'T' to the model number. An example of the Twisted Shank climber, model TB9409AT.

The Straight Shank is designed so the shank is flat from the top of the climber through the stirrup. For Straight Shank climber, do not add suffix 'T' to model number, example, TB9409A.

Cleated Climbers

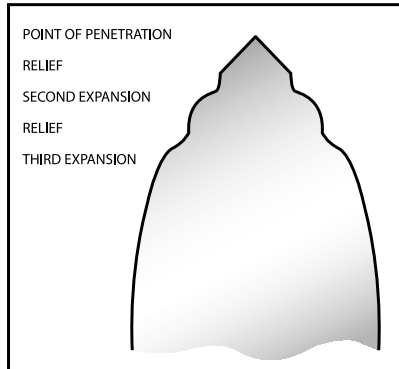

2 threaded replaceable cleat like logger spikes in the stirrup of the climber for traction climbing in wet & in damp conditions. Sold with 12 replacement cleats & wrench. To order, add an 'S' suffix to the climber number.

CCA GAFFS

C.C.A. Gaff - The utility pole widely accepted and used today is salt treated. Through the years, linemen have had difficulty climbing salt treated poles because conventional gaffs did not work efficiently.

Buckingham Manufacturing, in conjunction with Koppers, developed a gaff to make gaff penetration easier. The method in which the gaff penetrates is through expansion and relief, much like a serrated knife (see diagram). The C.C.A. gaff is available in permanent and replacement styles.

Replaceable C.C.A. Gaff Pole Climbers (Offset)

- | No. | Components Included |
|--------|--|
| 9108 | Leather footstraps only (21341) |
| 91089 | Nylon footstraps only (21391) |
| ▲9105 | Leather foot (21341) and leg straps (2234) with 'L' pad (3122) |
| ▲91059 | Nylon foot (21391) and leg straps (2239) with 'L' pad (3122) |

▲Complete Sets

Note: Add 'SB' to part number for screw type replaceable gaffs

C.C.A. Permanent Gaff Pole Climbers (Offset)

- | No. | Components Included |
|--------|--|
| 91078 | Leather footstraps only (21341) |
| 91079 | Nylon footstraps only (21391) |
| ▲8105 | Leather foot (21341) and leg straps (2234) with leather 'L' pad (3122) |
| ▲81059 | Nylon foot (21391) and leg straps (2239) with leather 'L' pad (3122) |

REPLACEABLE GAFFS - PIN STYLE

- 9106 1 11/16" C.C.A. pole gaff designed to penetrate the hardest poles with ease
